FF6709 SN 5W-30

6709

Innovative ester-containing premium fully synthetic engine oil, specially developed for petrol and diesel engines of NISSAN vehicles (including high-performance ones) with and without direct injection systems, with or without turbocharging, taking into account the requirements of car manufacturers to extend engine oil change intervals.

Product properties:

- Ester components provide excellent anti-wear and anti-friction properties due to the exceptional durability of the oil film, which, combined with excellent pumpability, significantly increases engine life even in engines with start-stop systems;
- Saves fuel thanks to excellent anti-friction properties;
- Ensures easy cold start and excellent pumpability, which substantially reduces engine starting wear;
- Excellent washing and dispersing properties effectively prevent all types of deposits and keep engine parts clean throughout the entire oil change interval;
- Effectively resists ageing due to the high thermal-oxidative stability, allowing to extend the oil change interval (up to 30,000 km);
- Smoothly flows to the turbocharger and other hardly accessible engine components, reducing the risk of coking residues.

Designed for petrol and diesel engines of passenger cars and light trucks of the RENAULT-NISSAN-MITSUBISHI alliance complying with EURO III, IV, V standards, where SAE 5W-30 oil, which meets ACEA A3/B4 and API SP standards, is recommended.

CORRESPONDS WITH REQUIREMENTS / SPECIFICATIONS / PRODUCTS:

{"Recommendation":["API SP","ACEA A3/B4","VOLKSWAGEN 502 00/505 00","FORD WSS-M2C913-B","MB 229.3","NISSAN KLAN3-05304"],"Approval":[],"Specification":["SAE 5W-30"]}
